

## Environmental and Sustainability Policy

**Whatungarongaro te tangata toitū te whenua**  
*As man disappears from sight, the land remains*

### INTRODUCTION

Sunergy Solar wish to embody Kaitiakitanga, Guardianship and Conservation. We value the people and environment that we are part of, which as Kaitiaki we have a responsibility to respect and protect. We accept that we must conduct our business with focus and drive in this manner.

This is a walk that we must take as a company. Every step that we take, we must consider and act in a manner that ensures ongoing preservation and regeneration of our society and environment.

### PURPOSE

This Environmental and Sustainability Policy aims to integrate a philosophy of sustainable development into all of Sunergy Solar's activities and to establish and promote sound environmental practice in our operations.

### POLICY

Sunergy Solar will:

- Maintain awareness of relevant environmental legislation and good practice to ensure that minimum standards are met and, where practicable, exceeded,
- Protect the environment and prevent pollution,
- Assist others, through implementation of our product, to achieve their sustainability goals, and
- Continually improve our performance relating to the above.

We will achieve this by:

- Providing a safe and healthy workplace,
- Reducing, reusing and recycling resources,
- Measuring and reducing waste to landfill,
- Seeking to partner with other stakeholders who share this view,
- Including social and environmental consideration when making decisions, prioritising where possible suppliers who support this same approach,
- Considering, and reducing where possible, our carbon emissions by;
  - Avoiding unnecessary travel by making use of technology, and planning trips to make the most efficient use of the distance travelled, and
  - Considering fuel efficiency and emissions when selecting and maintaining company vehicles,
- Having an environmentally aware culture, where responsibility is assigned and understood,
- Enhancing awareness among our employees, clients and suppliers – educating and motivating them to act in an environmentally responsible manner,
- Being an environmentally responsible neighbour in our community,
- Monitoring and assessing, usually monthly, our conduct and progress towards these targets,
- Partnering with Toitū to audit our systems and policy, working towards EnviroMark certification.
